DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 10, 11, 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims disclose a stopper with a location being a function of the height of the magnet. What is meant by the "function of the height" of the magnet? How is the magnet affecting the stopper? Is the movement of the stopper about the height of the magnet? Partially the height of the magnet? What functionality the height of the magnet affects the stopper? How the height of the magnet affects the stopper?

In order to advance prosecution in the merits, the Prior Art will be applied as best understood by the examiner.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10, 11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Agematsu et al in view of Matsuhima.

Agematsu et al discloses a rotor structure having coils 59, shaft 52, magnet 54, magnet holder 103 having a wall connected to the magnet 54 (see figure 10), a bushing 66 connected to shaft 52. Also, other features of how a bushing connected to the shaft are shown in figures 12, 13 and 14. Moreover, a stopper 65 is disclosed to be engaged in the shaft 52.

However, Agematsu et al does not disclose that the stopper may be positioned within a range of possible positions along the shaft.

On the other hand, Matsushima discloses for the purpose of reducing vibration of a motor due to speed of rotation of a rotor, a stopper 12 which is movable along the shaft 6 and may be place on several locations along the shaft (see figures 1, 2b & abstract).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to design a rotor structure as disclosed by Agematsu et al and to modify the invention by having a movable member along the shaft for the purpose of reducing vibration of a motor due to speed of rotation of a rotor as disclosed by Matsushima.

Response to Arguments

5. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., claims 10 and 11 do not disclose that the stopper is fixedly positioned along the shaft in one location and that the location corresponds to the length of the magnet and since the stopper can be positioned to the length of the magnet, it can be repeatedly utilized without changing the size) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Allowable Subject Matter

6. Claims 1-4, 6-9 and 12 allowed.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
